

ENVIRONMENTAL POLICY

Having an excellent environmental performance is one of the major goals of Tuprag. Wherever possible we prevent, or otherwise minimize, mitigate and remediate, environmental effects of Tuprag operations. Our Company is committed to perform all its exploration and operating activities in an environmentally responsible manner.

Whilst adopting continuous improvement as a principle within the scope of our operations, we will ensure that Tuprag;

- Performs all activities in a manner that integrates the protection of, the human health and the natural environment with the benefits of economic and social growth,
- Complies with all relevant environmental legislation, our commitments, and other requirements.
- Keeps related parties, including all employees, suppliers and contractors, and the local community, informed of technical, legislative and regulatory issues,
- Continuously improves and documents its performance to achieve the best environmental standards technically,
- Shares environmental performance transparently with the community, governmental departments and other stakeholders,
- Allocates necessary resources, provides training, equipment and systems to maintain the best environmental conditions where all company members cooperate and act with the sense of responsibility,
- Develops rapid response capabilities for all environmental incidents and emergency situations,
- Protects social and cultural assets related to the environment,
- Designs, operates and improves facilities based upon, the efficient and economic use of energy and materials, the protection of the environment, and the minimization or reuse of wastes;
- Identifies, evaluates, manages, and audits scientifically, the potential environmental impacts of the projects from inception through to closure .
